Experiment ⑤

Cleaning Data with Text Functions.
use of UPPER and LOWER, TRIM function,
Concatenate.

1. UPPER function: Converts text to uppercase.

Eg.   = UPPER ("hello")
       returns "HELLO".

2. LOWER function: Converts text to lowercase

Eg.   = LOWER ("HELLO")
       return "hello"

3. TRIM function: Removes extra spaces from text.

Eg.   = TRIM (" hello   world ")
       returns "hello world".

4. Concatenate function: Combines text strings.

Eg.   = CONCATENATE ("Hello", " ", "world")
       returns "Hello world".

5. PROPER Function : A text function that converts text to proper case, capitalizing the first letter of each word and making all others lowercase.

Formula: =PROPER (text)

eg.   =PROPER (" hello world ") returns "Hello world".

Note   Commonly used for formatting names, titles, and other text data.
